

# FORRO MODULAR

## MODULATE CEILING

### TEC 302

The Modulate Ceiling is made of flame-retardant PVC, ideal for the most varied types of environments. It is immune to termites, resistant to moisture and does not mold.

Easy to install, maintain and clean, in addition to eliminating expenses with painting. The product is compatible with different types of lighting fixtures. As it is removable, it allows maintenance to be performed on the upper part of the environments.

Attention: The Modulate Ceiling may not be installed in places where there is an atmosphere with chemical agents that are harmful to PVC.
