

RALOLINEAR

LINEAR DRAIN

Linear Drain was developed for modern and sophisticated environments, with unique designs. Designed to favor fast flow and with high efficiency, it can be applied in bathrooms, washrooms, changing rooms, kitchens, balconies, verandas, among other places.

Its nozzle with a tapered design features the best flow conditions on the market, allowing for high efficiency in water collection and can be allocated according to the position of the water outlet on the subfloor.

With a variety of finishes, the Linear drain guard comes in PVC, Chrome ABS and Stainless Steel options, with different models, colors and sizes.
